NATHAN TREADWAY

NETWORK ENGINEERING | CCNA

Monticello, MN | (574) 612-5995 | nathan.treadway2@gmail.com | technontheos.com

PROFESSIONAL SUMMARY

CCNA-certified network professional seeking an entry-level role as a network technician, NOC technician or network administrator. Built and operate a home lab on physical Cisco hardware connected to a production home network, including OSPF routing, HSRP gateway redundancy, a segmented firewall, centralized TACACS+ login and log monitoring. Document every change with pre-checks, verification and rollback. Bring 19 years of operations leadership at FedEx Ground: team management, process compliance, vendor coordination and measurable service improvement.

CERTIFICATIONS

Cisco Certified Network Associate (CCNA) | Cisco
Earned August 28, 2026

TECHNICAL SKILLS

Hands-on (home lab and coursework)

Routing: single-area OSPF, static and default routes, HSRP, IPv4/IPv6 dual stack, subnetting and VLSM

Switching: VLANs, 802.1Q trunking, inter-VLAN routing, Rapid PVST+, port security, DHCP snooping, Dynamic ARP Inspection, BPDU Guard

Security and access: extended ACLs, SSH hardening, TACACS+ and AAA method lists, multi-factor authentication for SSH, zone-based firewall policy, network segmentation

Services and monitoring: DHCP, DNS (Pi-hole), NAT, NTP, syslog, Grafana and Loki log analytics, alerting

Platforms: Cisco IOS (Catalyst 3750 and 3560, 2811 routers), Cisco 5508 wireless controller, UniFi gateway and switching, Linux (Debian), Proxmox virtualization, Tailscale VPN

Tools: Cisco Packet Tracer, Cisco Modeling Labs, PuTTY, Git

Familiar with (studied, lab work in progress)

eBGP, RADIUS and 802.1X, EtherChannel (LACP), QoS, SNMP, Ansible, REST APIs and JSON, Terraform, controller-based networking

PROJECTS

Home Lab Network Audit and Management-Plane Security | Nov 2026

technontheos.com

- Audited lab documentation and configurations against live devices; found and corrected drift, including edge access lists on one router that did not match the records.
- Verified 139 firewall policies line by line after a vendor update converted the firewall to a zone-based model; confirmed none was lost or changed.
- Built a default-deny firewall zone for management services, prepared while empty and cut over in one step with a one-step rollback.
- Deployed a TACACS+ and RADIUS server and an SSH jump host requiring a key plus a one-time code; moved the first router to centralized login with command accounting and a console-only break-glass account.

Home Lab on Physical Cisco Hardware | 2026 to Present

- Built a lab with a Layer 3 core switch, two access switches, two routers, a wireless controller and three access points, connected to a production home network by an 802.1Q trunk.
- Configured OSPF, HSRP, VLANs, Layer 2 protections and edge ACLs; run centralized syslog with Grafana and Loki and a Raspberry Pi serial console server.

Two-Site Hospital Network Design | Sep 2026

- Designed a dual-stack IPv4/IPv6 network for 200 staff across two campuses, with OSPF, HSRP at the core, VLSM addressing and design documentation.

NATHAN TREADWAY

CastleRysen RFP Network Project | Cisco Packet Tracer

- Built cafe and district-site networks and verified end-to-end connectivity to the Internet.
- Configured VLANs, port security, Dynamic ARP Inspection, BPDU Guard, DHCP snooping and IPv4/IPv6 dual stack.

NetworkChuck Academy CCNA Course | Completed August 2026

- Completed hands-on labs in Cisco Modeling Labs and all course exams.

PROFESSIONAL EXPERIENCE

Sort Manager | July 2020 - Present

FedEx Ground | Maple Grove, MN

- Led growth of two new package sorts in FY21, improving productivity and operational efficiency.
- Standardized Business Compliance Self Assessment (BCSA) processes and led quality action teams to strengthen operational consistency, safety, and compliance.
- Trained and developed internal leaders, supporting multiple promotions; received the Purple Promise Quality Award for a safety initiative.

Pickup and Delivery Manager | October 2011 - July 2020

FedEx Ground | South Bend, IN

- Managed 8 direct reports within a 57-employee team, helping achieve the district's second-highest on-time service performance while serving Fortune 500 customers.
- Supported 12 external companies operating up to 178 daily dispatched routes, coordinating service delivery, technology initiatives, and compliance requirements.
- Helped external partners optimize delivery operations, reducing travel by 900 miles per day and idle time by 110 hours per day.
- Coordinated process and technology changes with internal and external stakeholders, including two building openings, system transitions, and wearable technology initiatives.
- Applied Quality Driven Management (QDM) with district teams to develop regional contingency procedures and improve operations; led and participated in local and district audits.

Administrative Service Manager | 2011

FedEx Ground | South Bend, IN

- Managed customer service compliance, shipment quality assurance, settlement checks, and internal self-assessments; supported Canadian shipments and regulated material requirements.

Pickup and Delivery Coordinator | 2010 - 2011

FedEx Ground | South Bend, IN

- Supported customer service and contractor compliance in daily delivery operations.

Service Manager - Dock | 2007 - 2010

FedEx Ground | South Bend, IN

- Supervised 30-40 employees in inbound and outbound package operations, with responsibility for scanning, productivity, and employee development.

EDUCATION

Bachelor of Science in Business

Concentration in Finance & Accounting

Indiana University South Bend | South Bend, IN

ADDITIONAL SKILLS

Business systems and tools: Microsoft Excel, Word, PowerPoint, Outlook, and Teams; TMS; AS/400; Workday.
